OF TRANSFORMATIONAL ENERGY HEALING AND SHAMANISM

INTRODUCTION TO SHAMANISM 2: TALKING TO THE SPIRITS

This course in Shamanism is a deepening of our connection to the spirits and our spirit teachers. It will enhance and develop the student's ability to communicate with and receive information from the spirit worlds.

Subjects which will be covered are:

Journeying on the art of 'seeing' and interpreting the visual messages we receive. • The use and misuse of Power, using and channelling Power in healing work and manifestation. • Further work with the elements and their healing powers. • Working with our ancestors and web patterning in dealing with vows, contracts, curses and how they are held in place. Further work with shamanic tools and crystals.

The course is based around journeying and will also involve some healing work.

The 'Introduction to Shamanism' modules form the foundation for the whole shamanic course and should be completed first.
